

TRAILS

Enabling Data Analytics for Actions
Tackling Skills Shortages & Mismatch

Funded by
the European Union

ABOUT

TRAILS seeks to build on current data in skills mismatches and create novel tools and databases for measuring and classifying skills mismatches, using cutting-edge technologies like machine learning and AI.

It will empower VET and ALE centres to be able to match employees with educational opportunities, addressing skills gaps.

1

Identify skills
mismatch trends
and novel
mismatch
indicators

2

Assess the
impact of
mismatch

3

Identify
new skills
protocols

4

Assess the
role of Adult
Learning and
Vocational
Education

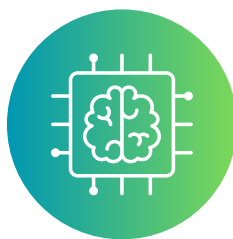

5

Empower
skills matching

SCOPE

Novel tools and databases
for measuring skills shortages and
mismatch

AI real time skill profiling
and matching for reducing skill
gaps

Partnering with VET and Adult
Learning Authorities

Contributing
to the European Skills Agenda
